Building cities that work for people

The background of the slide is a collage of three photographs. The leftmost photo shows a man with a mustache, wearing a light-colored striped shirt, smiling and counting a stack of Indian Rupee banknotes. The middle photo shows a family of three: a woman in a pink sari, a woman in a purple sari, and a man in a light blue shirt, all smiling. The rightmost photo shows a man in a blue and red jacket standing in a crowd, looking towards the camera. A semi-transparent grey banner with a thin orange vertical line on the left side is overlaid across the middle of the collage.

UPYOG Service overview and Set-up

Core Service

- The UPYOG platform has around 25 core microservice
- Each microservice is designed to perform a particular task (Reusable tasks like uploading file, encrypting data etc.)
- Core microservices are highly scalable
- Git Link: <https://github.com/egovernments/UPYOG-OSS/tree/master/core-services>

API Links And Documentation

- API postman links(collection) can be found in the following document:

[UPYOG Services: API Contracts and Readme Links](#)

- Swagger documentation for each service can be found on git in the README.md file of each service (Also present in above link as well)
- Documentation for the service can be found in the following link:

[UPYOG Core Documentation](#)

Local Setup

- Every microservice contains LOCALSETUP.md file
- The infra dependencies mentioned in the file should be installed
- Detail steps for running the application (including changes in application.properties if any) are given in the .md file

Troubleshoot using Browser network Tab

Identify network faults and start resolving them.

To Check network calls

- Right click on screen -> inspect -> click on network tab
- Filter for fetch/xhr to see all API calls and see the network call.
- Preview the API call to see more information about the Error.

More details about the Troubleshoot.
